τ effect — $n = 5$, $\omega = 0.5$

$\tau < 0$ $(\tau = -\omega/2n)$
$\tau = 0$
$\tau > 0$ $(\tau = +\omega/2n)$

Normalised KL energy
Mean error $\|m\|_2$
Rel. cov. error $\|C - I\|_F/\sqrt{n}$
Volume error $|\log\det C/n|$
Shape error (trace-free $\log C$)
Cosine

Mean only
Volume high
Volume low
Shape only
